🐦 vjarysta

Enthusiast web developer.

SKILLS

Web Development
Intermediate

javascript | angular | react.js | vue.js | html | css

WORK EXPERIENCE

Front-end developer at SFEIR **February 2018- Now**
https://www.sfeir.com/

I improved my code quality at SFEIR, in different ways. I was introduced to Test-Driven Development and instantly loved it. Behavior-Driven Development was also mandatory for every feature.

- Vue.js
- React.js
- Jest
- Cucumber.js
- Webpack
- HTML
- CSS
- Git
- Npm
- Agile

Front-end developer at Temelio **November 2016- January 2018**
http://temelio.com/

Working at Temelio helped me gain rigor. Startup with around twenty employees, they gave me the opportunity to learn processes and tools used by most of the tech companies (Jira, Git Flow, code reviews). My work first was to add new features to the onboarding platform, then diversified: I had the opportunity to code in Python, to automate the generation and sending of a detailed PDF report sent weekly to clients, in PHP for the partners synchronizations (tracking pixels).

- Angular.js
- HTML
- CSS
- Python 3
- PHP
- Git
- Gulp
- Npm
- Agile
- Jira

Front-end developer (internship) at Kostango **April 2016- November 2014**
https://kostango.com/

Second professional experience in a startup, in which I mostly improved my Angular.js skills. In charge of all the front-end part of the platform, I also developed back-end modules, using Django REST and PostgreSQL. The sysadmin part was also one of my roles.

- Angular.js
- HTML
- CSS
- Bootstrap
- Django REST
- Git
- Grunt
- Npm
- Bower
- Nginx
- Agile
- Pivotal Tracker

Full-stack web developer (internship) at Pickwave **September 2014- December 2014**

My internship in this company was my first professional experience, in which I learned JavaScript technologies. In a team of 3 developers, I participated in the development of the platform from scratch, which was a professional social network, for the cinema world. I had the opportunity to learn JavaScript from the MEAN.JS stack, and improve my Angular.js skills.

- MongoDB
- Express
- Angular.js
- Node.js
- HTML
- CSS
- Git
- Grunt
- Npm
- Bower
- Bootstrap
- Agile
- Pivotal Tracker

EDUCATION

Computer Science at 42
2013 - 2016

Major courses: algorithmics | graphics | unix

LANGUAGES

INTERESTS

Music

Skills acquired: saxophone | guitar | keyboard

Domotics

Skills acquired: raspberry pi | arduino
